

Building ERB Emergency Action Plan

Definition of Terms and Symbols

Location of building exit: A fire exit that is not wheelchair accessible.

Location of accessible exit: An exit that is accessible to those with a mobility impairment. It is wheelchair accessible.

Location of area of refuge: A safe area to stay and await assistance during a fire. This may be a dedicated area of refuge either inside or outside the building, or this may be an enlarged floor level landing inside an exit stairwell.

Interior area of refuge: The extent of an area dedicated for the safe harboring of persons awaiting assistance during an emergency.

Exit stairwell location: A stairwell in a fire-safe enclosure. The letter designates the stairwell's identifier for emergency personnel.

Boundaries of the exit access corridor: The extent of a corridor, hallway, or aisleway used for the purpose of gaining access to an exit door or exit stairwell. Must be kept clear for instantaneous use.

Muster point: A location at a safe distance outside the building where building personnel must gather during an emergency to await instructions and report any emergency information.

Tornado shelter: An area designated for safe harbor during an extreme weather emergency or for interior shelter-in-place.

Outdoor area of assisted rescue: The extents of an outdoor area dedicated for the safe harboring of persons awaiting assistance during an emergency.

Building ERB First Floor Emergency Action Plan

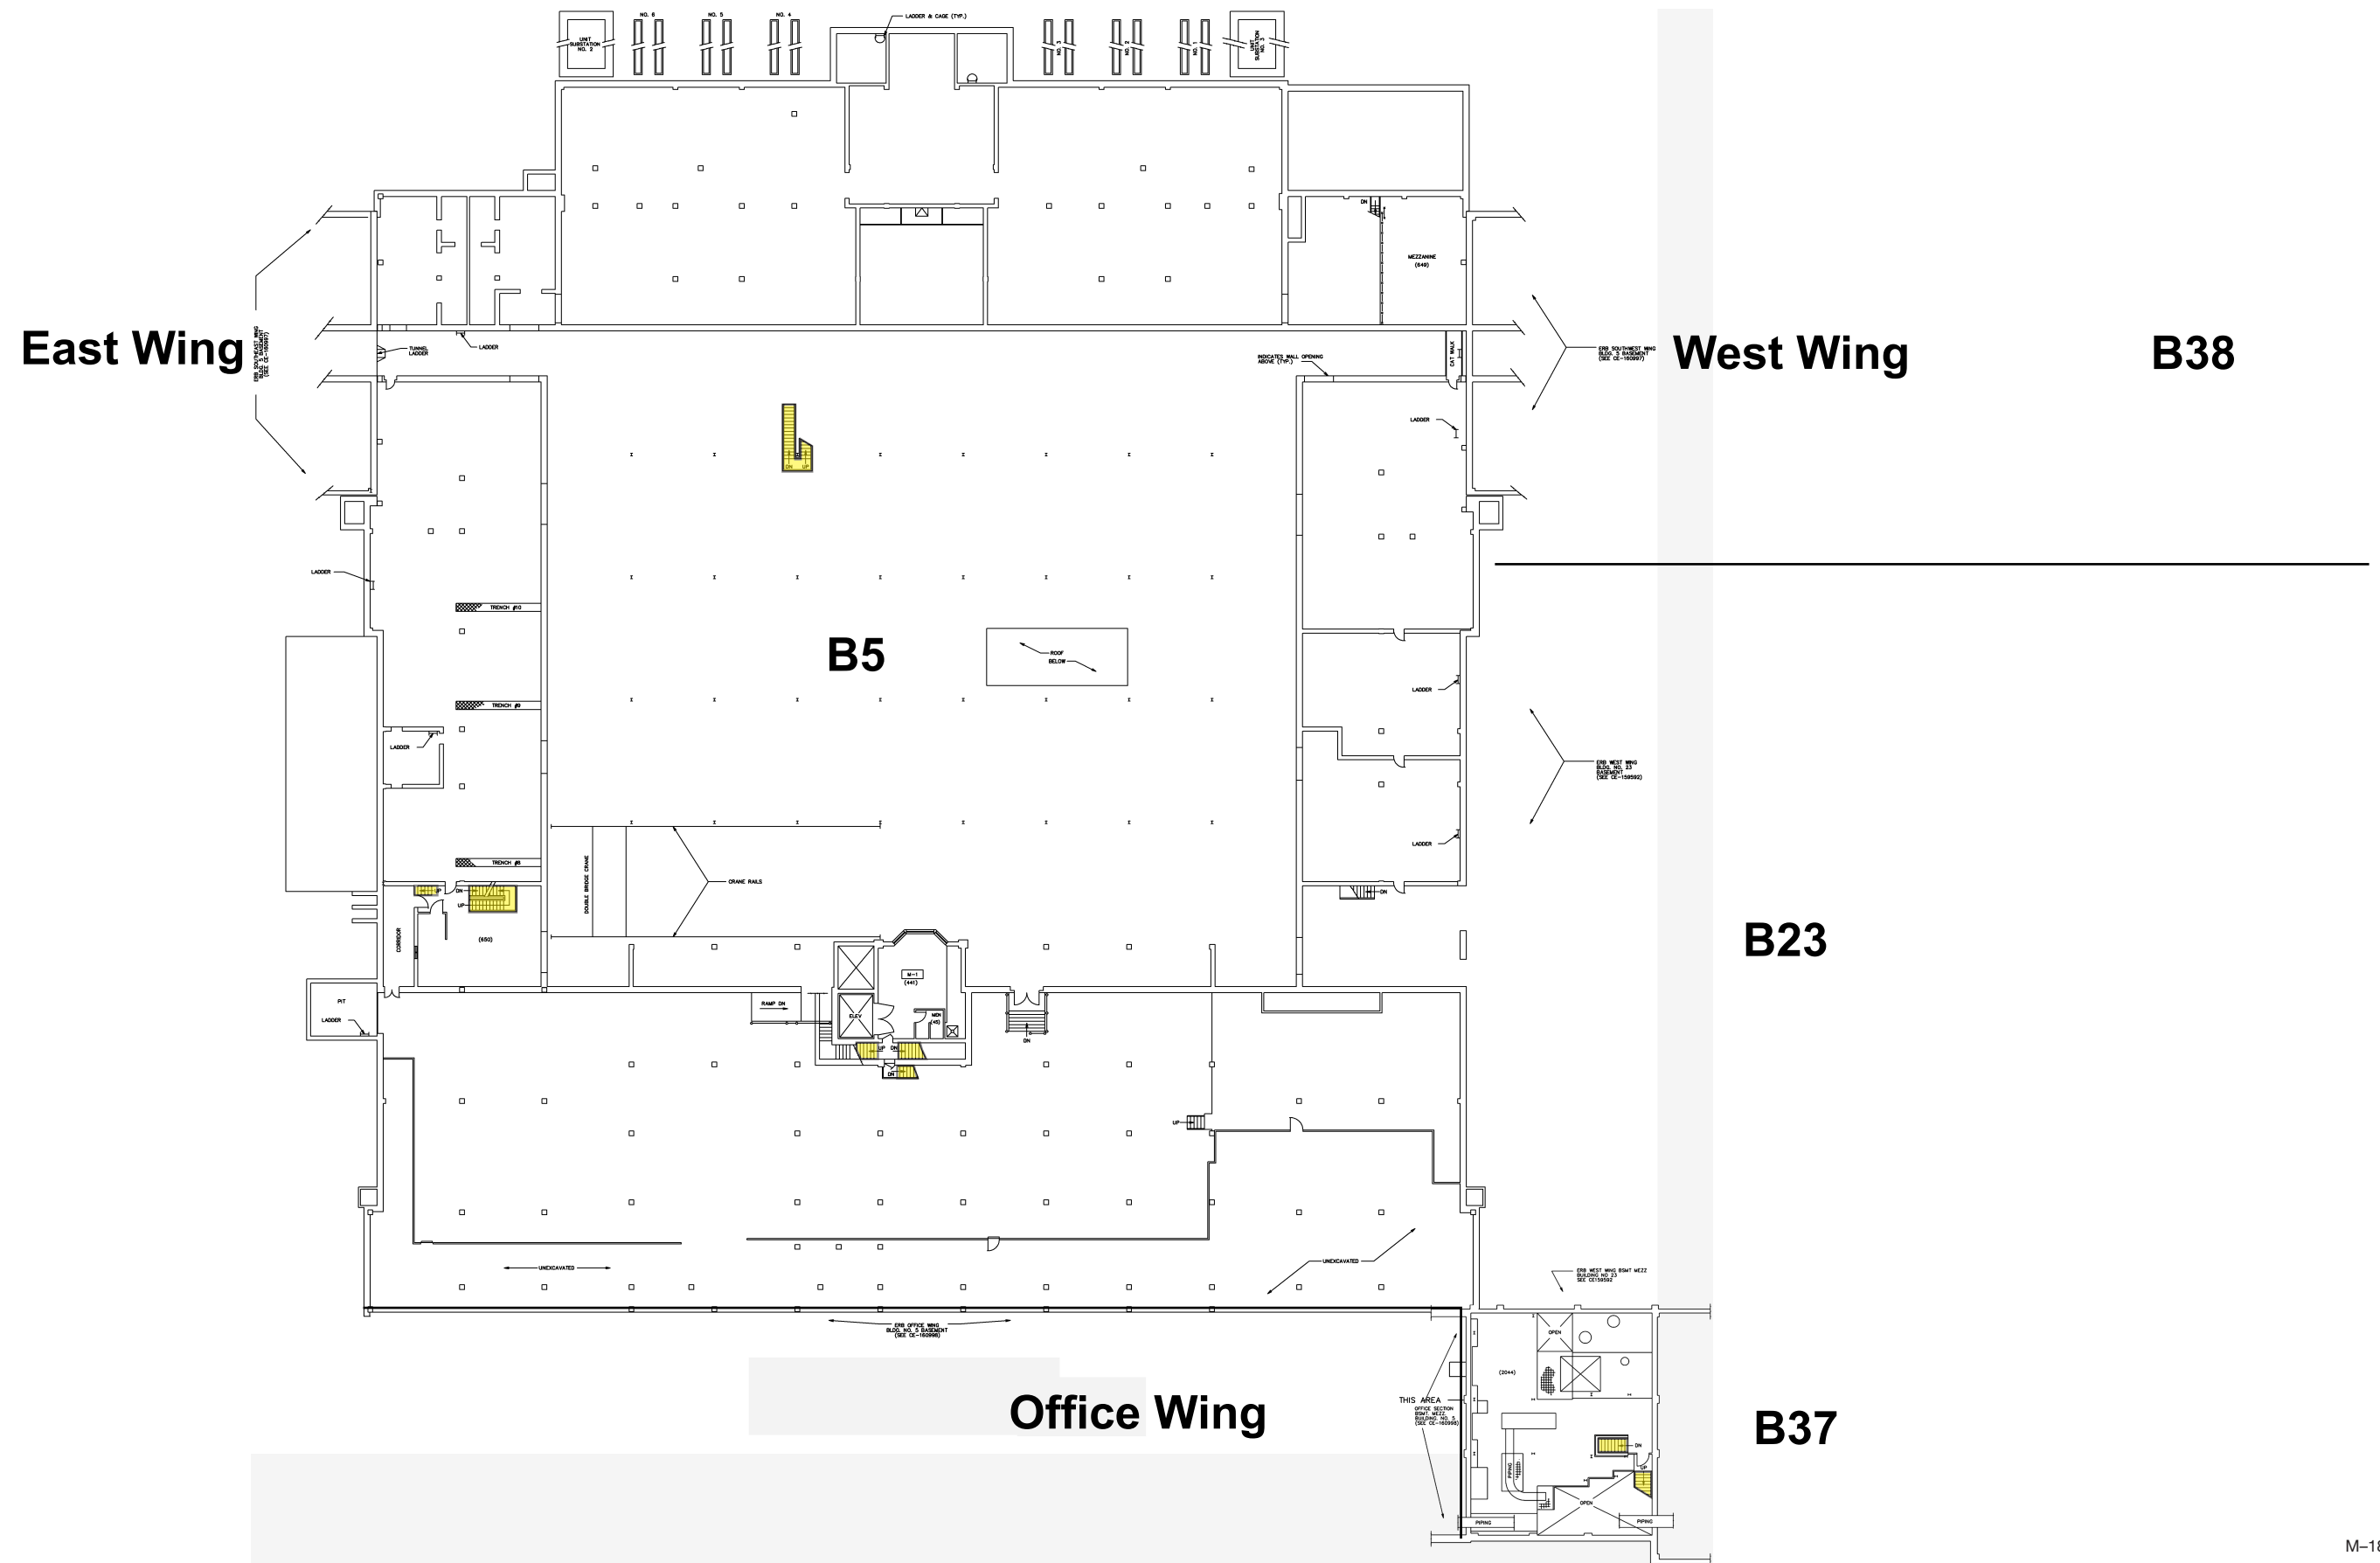

Office Wing

The floor plan illustrates the layout of the Office Wing, which is divided into three main sections: B5, B23, and B37. Section B5 is the central part of the wing, featuring a large open area with a yellow highlighted path running through it. It includes several rooms labeled 'UPPER PART' and 'LOWER PART', as well as a 'MEZZANINE'. Section B23 is located to the right of B5 and contains a large 'UPPER PART SHOP AREA' and several smaller rooms. Section B37 is at the bottom of the wing and includes a 'TRAINING ROOM "A"' and a 'TRAINING ROOM "B"'. The plan also shows various corridors, stairs, and structural elements like crane rails and mezzanines. A yellow highlighted path runs through the center of the wing, connecting different sections. The plan also shows crane rails, stairs, and other structural details.
